

Client:	Republic Bank
Target:	example.com
Report ID:	ENG-260727-3AD908
Date:	2026-07-27
Service:	Pentest

TrinTech Digital Defense conducted a comprehensive security audit of **example.com** on behalf of **Republic Bank**. This assessment evaluated the organization's network security posture, identified vulnerabilities, and provides actionable recommendations.

1. Missing Security Header: X-Content-Type-Options

What it means: MIME sniffing risk

2. Missing Security Header: X-XSS-Protection

What it means: XSS header missing

3. Unencrypted HTTP

What it means: N/A

4. Missing: X-Content-Type-Options

What it means: N/A

5. Missing: X-XSS-Protection

What it means: N/A

1. Missing Security Header: Strict-Transport-Security

What it means: HSTS missing

2. Missing Security Header: X-Frame-Options

What it means: Clickjacking risk

3. Missing Security Header: Content-Security-Policy

What it means: CSP missing

4. Missing Security Header: Referrer-Policy

What it means: Referrer policy missing

5. Missing Security Header: Permissions-Policy

What it means: Permissions policy missing

6. Missing: Strict-Transport-Security

What it means: N/A

7. Missing: X-Frame-Options

What it means: N/A

8. Missing: Content-Security-Policy

What it means: N/A

9. Missing: Referrer-Policy

What it means: N/A

10. Missing: Permissions-Policy

What it means: N/A

11. Info Disclosure

What it means: N/A

Open Ports (4):

80	HTTP	MEDIUM
443	HTTPS	MEDIUM

8080	HTTP-Proxy	LOW
8443	HTTPS-Alt	LOW

DNS Records: 10 found across 6 types

Subdomains: 1 discovered
